SOURCE Monitored Broadcast

Copenhagen, broadcasting in the Danish Home Service on 10 March at 2100 GMT, transmitted the following announcement:

"On the night between March 14th and 15th, practically speaking, all European radio stations will change their wave lengths. Here in Denmark Kalundborg's wave length will change from 1250 metres to 1224 metres and the Copenhagen Station at Hersted-Vester will change its present wave length from 255 metres to 210 metres. In addition a local transmitter will be installed temporarily in Copenhagen on 202 metres. It will be so weak however that it will hardly be heard beyond the Copenhagen area."
